

Orchid Case Study:

ORCHID EXTENDER HELPS K&K INTERIORS KEEP THEIR HOUSE IN ORDER

“The warehouse staff are absolutely stoked about the efficiencies they are seeing.”

JUSTIN SLATER - PURCHASING MANAGER
K&K INTERIORS, INC.

Company

K&K Interiors, Inc., established in 1996 and based in Ohio USA, is a leading wholesale supplier of home decor, offering retailers a vast range of everyday and seasonal items.

The K&K design teams are continually developing new product lines and visual presentations to keep a fresh, new look for their customers.

Challenge

K&K import huge volumes of products from their suppliers. A given Purchase Order will often contain dozens of line items, to be fulfilled in multiple shipments.

To facilitate receipt at the warehouse, an alphanumeric string identifying a specific shipping container needs to be captured against each PO line item, via an Optional Field in Sage 300 ERP, and fed into an external Warehouse Management System.

Container details are not known at the time of PO entry, and can change right up to the shipment date.

Updating dozens of line items to assign lengthy Container IDs was a laborious, repetitive and error prone task, made worse by the Optional Field data entry being several clicks away from the main Sage 300 screen.

Solution

K&K's Sage 300 Business Partner, DataQuest, saw an opportunity to streamline this process using a combination of Orchid's **Extender** and **Notes** products. They approached Orchid with a proposal for a customisation.

Extender would:

- Introduce an “Add Container” button, enabling new container details to be entered against a PO.
- Allow one of the known Container IDs for the PO to be easily associated with each line item, and automatically written back to the appropriate Optional Field.
- Run scripts to determine all Container IDs associated with the PO, and identify any line items that had not yet had a container assigned.

Notes would be used to display the results of these scripts.

Work *smarter* with Orchid

Result

Justin Slater, Purchasing Manager for K&K, was delighted with the outcome, and reported that the warehouse staff were equally enthusiastic.

What had been tedious and time consuming work could now be accomplished with a few key strokes.

The integrity checking and prominent warnings built into the solution also meant far fewer data entry errors.

Why Orchid?

Orchid Systems, a global Sage Endorsed and Gold Development Partner, has been part of the Sage community for over 20 years. We develop innovative Add-ons to enhance the functionality of Sage 300 (formerly Accpac).

We are a winner of multiple awards from Sage, including International Development Partner of the Year. All our Add-ons are developed within the Sage Software Development Kit (SDK), so they look and feel like other Sage 300 modules.

Visit our website anytime, or contact us to find out why over 5,000 Sage 300 sites worldwide rely on Orchid Add-ons every day to help their businesses work smarter.
